

SelectaDNA forensic Tagging Spray is a proven crime-fighting device that scientifically, and irrefutably, links criminals to specific crime scenes

The handheld spray is used by law enforcement and licensed security guards to forensically mark criminals – and their getaway vehicles – from a safe distance, allowing for proper identification at a later time or date. Highly effective against robbery, theft, looting, rioting, vandalism and other crimes.

Ideal for police, security guards and qualified employees to discreetly tag, then later detect, criminals involved in specific criminal activity

Excellent tool for crime prevention efforts, as well as enhancing criminal investigations to more effectively identify, apprehend and prosecute offenders

The invisible forensic solution is aimed at a criminal's torso, or backside, with intention of marking clothing, skin and getaway vehicle

Each universally unique forensic ID code is registered to ensure each piece of evidence is connected to a sole owner and location

HOW DOES IT WORK?

- Forensically tags criminals with universally unique forensic ID codes
- No code will ever be replicated, providing law enforcement with absolute certainty in connecting a criminal to a specific crime scene
- The invisible forensic solution remains on skin and clothing from weeks to months
- It's detected by law enforcement using a special frequency UV light, or specially-trained K-9s
- Essential training is provided, gratis, to law enforcement and security guard companies

	19890	19904	19896
Product (SKU):	19890	19904	19896
Unit colour:	Orange	Black (with anti-slip coating)	Black
Volume:	30ml	60ml	400ml
Total weight:	3.73 oz	5.36 oz	20.28 oz
